Chalmers' RBA reforms: The next chapter in the private hijacking of Australian banking

A four-part series in the Australian Almanac brings back to life the debates of the late 1950s over the creation of a central bank independent of the government—the Reserve Bank of Australia. Published in the *Australian Alert Service* of 10, 17, 24 April and 8 May, “Chalmers’ RBA reforms: The next chapter in the private hijacking of Australian banking”, shows that the banking reforms of the post-WWII Robert Menzies government amounted to a takeover of national banking functions by private interests, at the recommendation of international central bankers and their local private banking satellites.

The included documentation, excerpts from the Hansard of that time, should make the Albanese government cringe with shame at what they are proposing today in the Reserve Bank Reforms Bill 2023, which among other travesties would remove the government’s power to overrule the RBA. The 1959 speeches include a vigorous defence of the Commonwealth Bank and its incredible achievements in its role as Australia’s national bank (which even the Menzies government of the day did not try to deny), by Australian Labor Party greats from Gough Whitlam to Jim Cairns, then in Opposition; and expositions on the private control of banking from patriotic statesmen of whom most Australians today will never have heard. The orations include a detailed survey of the political, banking and big-business complex, which shepherded the 1959 banking legislation through the halls of parliament.

The bottom line in the effort to “erase the potential of the Commonwealth Bank to act in the interest of the people”, is that even leading representatives of the Menzies government insisted that in the final analysis “the Prime Minister and the Treasurer are supreme in relation to the Governor of the Reserve Bank”. Today, Australians cannot let Treasurer Jim Chalmers junk democratic protections that leaders on both sides of politics have deemed crucial.

King O'Malley: A National Postal Bank goes hand-in-hand with a Commonwealth Bank

Read a three part series summarising key elements of legendary Aussie MP King O'Malley's proposal for a National Postal Bank and a Commonwealth National Bank, in his five-hour parliamentary speech of 30 September 1909.

- RBA take note! O'Malley tells how to regulate credit
- King O'Malley tells how to create a nation of producers
- O'Malley: ‘Finance is a government institution’

Other articles on austerity

A case study in austerity: Jeff Kennett's Victoria

The *Australian Alert Service* has published “[A case study in austerity](#)”, a four-part series by Elisa Barwick which focuses on the “revolutionary” economic model imposed by Jeff Kennett as Premier of the Australian state of Victoria in 1992-99—a model that swept the country and wrought destruction nationwide. “Whether it be our collapsing power grid, hollowed-out healthcare, or emaciated education system,” the series opens, “Victorians are living the results of the earliest neoliberal experiment on Australian soil—featuring budget and industrial austerity, deregulation, privatisation, asset-stripping and public sector ‘reform’.”

Following on from last year’s series *The genesis of Austerity*, now available for download as a pamphlet (above), Barwick now shows how the program for Victoria was scripted well ahead of Kennett’s election, by a combination of think tanks associated with the global Mont Pelerin Society. The authors of the 1920-30s austerity program that had led to Fascism and Nazism, precipitating World War II, after the war set up the MPS complex to save their economic model under the more acceptable guise of “neoliberalism” and spread it across the world. As in Europe, the MPS “solutions” in Australia were propelled by debt crises, which economic liberalisation and financial deregulation had themselves created.

The new series includes these articles:

[Open PDF](#)

- How Jeff Kennett's Victoria paved the way to neoliberal hell
- Jeff Kennett's privatisation rip-off
- Kennett outsources the state
- Financial deregulation propels Kennett's rise

In the article "How MPs' brains were painted neoliberal", we also profile the Institute of Public Affairs, one of the big business-backed think tanks that ushered neoliberalism into Australia, by sponsoring Kennett and brainwashing countless Australian parliamentarians.

How 'Operation China Threat' demonised the Belt and Road Initiative—a Special Report

Now available in pamphlet form and as a single pdf file is the May-June 2022 *Australian Alert Service* series "How 'Operation China Threat' demonised the Belt and Road Initiative", by Melissa Harrison. The four articles document the methods and motivation of the disinformation campaign against China's BRI in Australia and around the world.

Since mid-2017 the Australian public has been targeted with propaganda, issued through mainstream media in coordination with national security and intelligence agencies and associated think tanks, to demonise China and the BRI. The distortion of the public perception of the Belt and Road Initiative is one part of a wider strategy for maintaining Anglo-American primacy in the Asia-Pacific region, through ever greater projection of US-UK military power, and through the City of London and Wall Street-controlled global financial architecture.

This series documents how under the BRI, China has revived the tradition of nation-builders like the Americans Alexander Hamilton and Abraham Lincoln, and their Australian co-thinker King O'Malley, who advocated using public credit to finance infrastructure development. China's public investment approach is a threat to the post-World War II order, which especially since 1971 has enriched London and Wall Street banks and corporations, by enabling the looting and financial repression of developing nations. China's alternative economic approach threatens the geopolitical power of the USA and UK, which rests upon the deregulated global financial system alongside military might.

The pamphlet includes two supporting articles:

- "Geopolitical elites fabricated BRI 'debt-trap diplomacy' narrative" reveals that baseless allegations about China's lending for the BRI have been fabricated by "national security" proponents of British geopolitical theories that define international relations as a zero-sum game, in which the progress of one nation can only come at the expense of others.
- "Belt and Road opposition is a century-old 'Great Game'" shows that the demonisation of international infrastructure projects is not new. Predecessors to the BRI proposed by the USA, Japan, Russia and European nations were targeted for derailment by the same Anglo-American power structures that are viciously fighting the BRI today.

Who ended the Bretton Woods system and opened an age of infinite speculation?

The floating currency exchange-rate system, instituted

with the end of the Bretton Woods agreements 50 years ago, decoupled finance from the real economy throughout the trans-Atlantic financial sector and its appendages, Australia included. Many financial woes of nations and much suffering of people stem from the decisions made then. The people who wrecked Bretton Woods took aim against the post-war order US President Franklin Roosevelt had envisioned, in which sovereign nation-states could each and all develop economically for the benefit of their populations.

Unique research and insights into who the wreckers were and how they operated is presented in the six articles from the Australian Alert Service assembled here.

- “The takedown of Bretton Woods and the rise of financial speculation”, AAS, 28 July 2021
- “Destroying Bretton Woods: The rise of the Neoliberals”, AAS, 4 Aug. 2021, reviewing Nicholas Shaxson’s 2018 book *The Finance Curse: How Global Finance is Making Us All Poorer*
- “BIS: The sleeper cell that destroyed Bretton Woods”, AAS, 11 Aug. 2021, a look at the Bank for International Settlements, the central bankers’ bank the original Bretton Woods conference failed to dissolve

From a two-part Australian Almanac in the AAS of 8 and 15 Sept. 2021, “An age of infinite speculation: Who wrecked Bretton Woods, and why” (8 and 22 Sept. 2021):

- “The creation of the worldwide casino”, excerpted from our 2016 pamphlet *The British Empire’s European Union: A Monstrosity Created by the City of London and Wall Street*
- “Two varieties of monetarism: the Keynesian and ‘Austrian’ foes of real economic progress”, by Allen and Rachel Douglas, revealing the clique that pushed through “floating exchange rates” in the 1970s
- “The early economic forecasts of Lyndon LaRouche”, by EIR magazine editor Paul Gallagher, an edited transcript of his presentation to a conference on the 50th anniversary of the end of Bretton Wood
